

[Summary]

You need a nutrition plan to maintain your football fitness and performance while on vacation in France.

[Response]

Perfect! Staying fueled properly during vacation is key to keeping your energy and performance up. I

To create a personalized nutrition plan for your trip, I need to know:

1. **\*\*How old are you?\*\*** (helps me recommend right portion sizes)
2. **\*\*What's your playing position?\*\*** (strikers and defenders have different energy needs)
3. **\*\*Will you be training while in France?\*\*** (How many times per week? What type - full sessions, light, etc.)
4. **\*\*Any dietary restrictions or allergies?\*\*** (vegetarian, dairy-free, nut allergies, etc.)
5. **\*\*What foods do you enjoy?\*\*** (helps me suggest meals you'll actually eat!)
6. **\*\*Where will you be staying?\*\*** (hotel with kitchen, Airbnb, with family, etc.? This affects what you can eat)
7. **\*\*What's your main nutrition goal for the trip?\*\*** (maintain energy, recover well, stay hydrated, etc.)

Once I understand your situation, I'll give you:

- Easy meal ideas you can find in France
- Pre-training and post-training nutrition
- Hydration strategies for travel
- Snack suggestions

What can you tell me about these points? ■■
